DataClient

DataClient is a small powerful utility that runs on your computer and automatically downloads stock data onto your PC.

You can nominate which exchanges you would like downloaded to you computer and DataClient will automatically connect each day and download your data. Data can be stored locally on your computer in either ASCII or Metastock binary format.

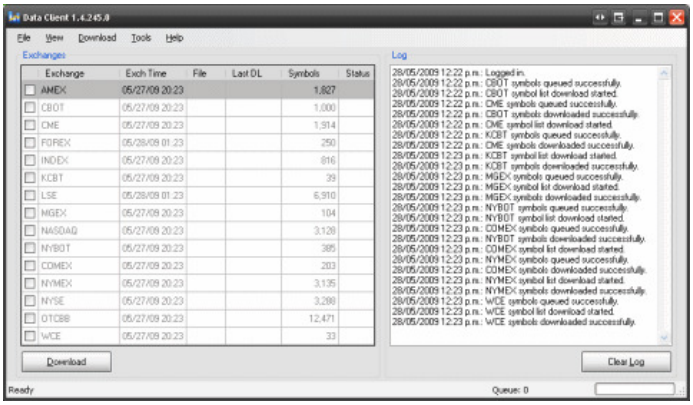
FREE download for Silver, Gold and Platinum Members

DOWNLOAD NOW

Information such as Exchanges and Symbol Lists are automatically kept up-to-date.

You can also manually download symbol history or request an entire range of dates across an entire exchange.

Platinum members have the added benefit of being able to automatically or manually download intraday data each day.



White Labelling

DataClient can be completely white-labelled and full customer and service management facilities are provided. Data can be delivered automatically in a variety of formats each day at market close. If you are interested in using DataClient with your client application then please contact: sales@eoddata.com

In the next release of DataClient we will be adding the following features:

1. Automatic adjustment for Splits
2. Automatic application of Symbol Changes
3. Automatic adjustment for Dividends
4. Support for PRO format (SuperCharts)

Get started with EODData in 4 easy steps:

1 **Register** ✓

2 **Subscribe** ✓

3 **Historical Data**
